

/home/runner/work/Raytracer  
/Raytracer/src/Logger.hpp

ILogger.hpp

string

```
graph TD; A["/home/runner/work/Raytracer  
/Raytracer/src/Logger.hpp"] --> B["ILogger.hpp"]; A --> C["string"]; B --> C;
```

The diagram illustrates the dependencies of the file `/home/runner/work/Raytracer/Raytracer/src/Logger.hpp`. It is represented as a box at the top. Two arrows originate from this box: one points to a box labeled `ILogger.hpp` to the right, and another points to a box labeled `string` at the bottom. A third arrow points from the `ILogger.hpp` box down to the `string` box, indicating that `ILogger.hpp` also depends on `string`.
