

std::exception

```
classDiagram
    class std_exception["std::exception"]
    class RayTracer_Scenes_ConfigWrapper_ReadException["RayTracer::Scenes::ConfigWrapper::ReadException"]
    RayTracer_Scenes_ConfigWrapper_ReadException --|> std_exception
```

The diagram illustrates a class hierarchy. At the top is a box representing the `std::exception` class, divided into three horizontal sections. Below it is a box for the `RayTracer::Scenes::ConfigWrapper::ReadException` class, also divided into three sections. A blue arrow with an open triangular head points from the top section of the lower box to the bottom section of the upper box, indicating inheritance.

RayTracer::Scenes::  
ConfigWrapper::ReadException

- \_message

+ ReadException()
