

/home/runner/work/Raytracer
/Raytracer/src/Parameters.hpp

```
graph TD; A["/home/runner/work/Raytracer  
/Raytracer/src/Parameters.hpp"] --> B[exception]; A --> C[memory]; A --> D[map]; A --> E[string];
```

The diagram illustrates a file path at the top, which then branches out via four arrows to point to four separate variable names: exception, memory, map, and string.

exception

memory

map

string
