

std::exception

```
classDiagram
    class std_exception["std::exception"]
    class RayTracer_Scenes_ConfigWrapper_ReadException["RayTracer::Scenes::ConfigWrapper::ReadException"]
    RayTracer_Scenes_ConfigWrapper_ReadException --|> std_exception
```

The diagram illustrates an inheritance relationship. At the top is a box representing the `std::exception` class, divided into three horizontal sections. The bottom section is empty. Below it is a blue arrow pointing upwards, indicating inheritance. At the bottom is a box representing the `RayTracer::Scenes::ConfigWrapper::ReadException` class, divided into three horizontal sections. The top section contains the class name, the middle section contains a private attribute `- _message`, and the bottom section contains two public methods `+ ReadException()` and `+ what()`.

RayTracer::Scenes::
ConfigWrapper::ReadException

- _message

+ ReadException()
+ what()
